

# VULPES: INSIDE OUR SMART RUNNING SHOES

## **-50% Heat Fluctuation:**

Inspired by a fox's ability to change coats, the air powered insoles combine two advanced heating/cooling materials to keep your feet at just the right temperature throughout your run and through any season.

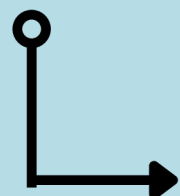

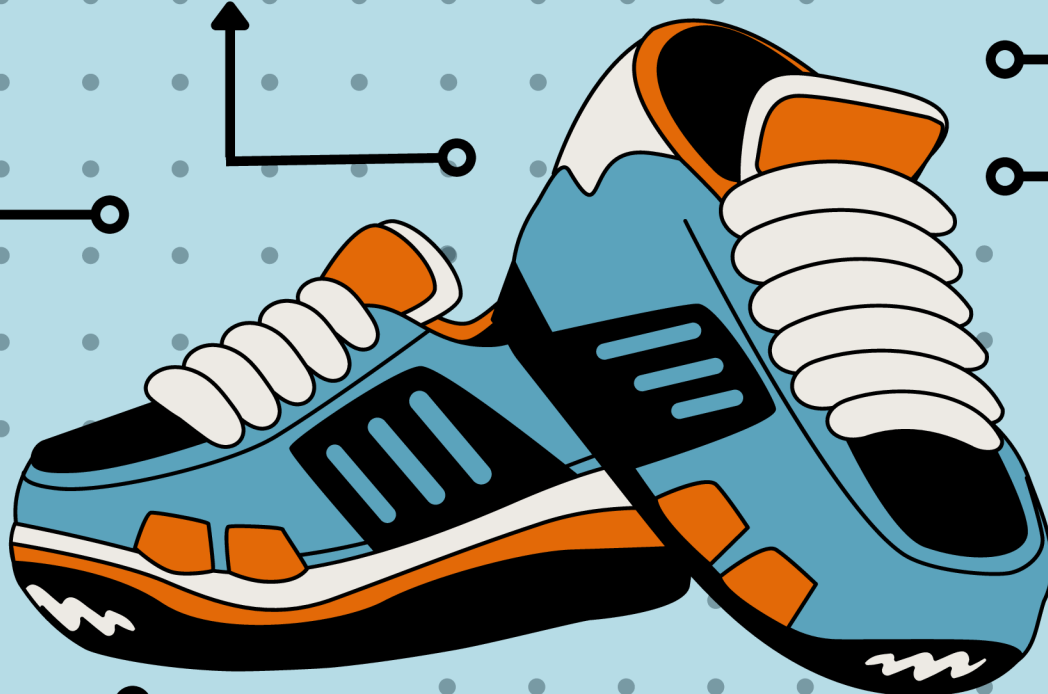

## **For Any Runner of Any Skill Level:**

Our distance tracking running shoes come in all sizes. Vulpes running shoes will help power up your running journey for years to come with just one 300\$ purchase.

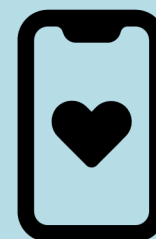

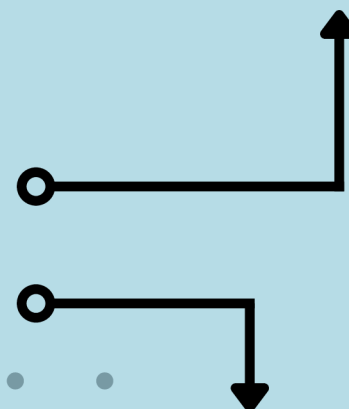

## **Built in Distance Tracker:**

We combined running shoes with a distance tracker so that you can get all of the functionality of a smartwatch without a separate purchase. Our shoes use precise technology to track and store all your running data for each session in our app so you can track your goals and progress at any time.

## **Free Lifetime Membership:**

By purchasing these shoes, you will receive a premium lifetime membership to our companion app that holds all of your running data and progress. You can also connect with other runners on the app and participate in running leaderboards.

## **Running Companion App:**

The Vulpes runner app tracks your run's geography and weather, and can help you build music playlists and workout plans to personalize your runs and make them perfect.
