

\$mart Byte

Smart Byte is an app that improves budgeting habits by providing a user with a daily limit of money they are able to use. When a user attempts to exceed this limit, large teeth will clamp on their digital wallet and blockade the user from spending anymore money.

The Angel on your shoulder for the right financial decisions

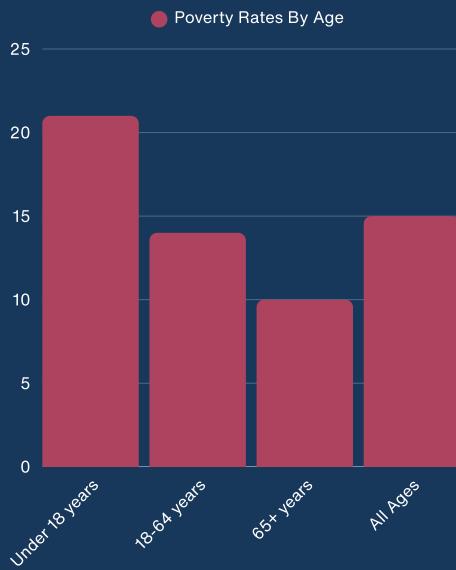

Of Americans live paycheck to paycheck, with 47% of these making up Gen Z

Americans spend roughly \$18,000 a year on non-essentials, roughly 33% of their income

Many Americans live paycheck to paycheck without any backup plans for financial emergencies. The ability to save money to not only safeguard against these emergencies but also live a stable life, is essential.

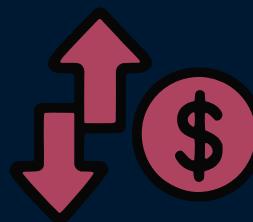

Most people who suffer from poverty fall into either the category of Millennial or Gen Z, especially those fresh out of college.

13.5% of US Households struggle to afford food and groceries
